PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience across React frontends and Node.js/Express backends, with direct fintech domain experience on a mobile crypto wallet product covering wallet balances, deposit/withdrawal flows, KYC onboarding, and P2P trade management. Comfortable owning modular frontend and backend components end-to-end, integrating RESTful APIs and real-time WebSocket events, and working with PostgreSQL, MySQL, and MongoDB-backed services. Experienced with authentication flows, code reviews, and clean, documented architecture, and deploying to AWS (EC2/RDS) with CI/CD pipelines (GitHub Actions). Comfortable working independently in remote, cross-functional teams alongside Product, Design, and Engineering leadership.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, TanStack Query, Zustand, Tailwind CSS

Backend & APIs: Node.js, Express.js, RESTful API design & integration, GraphQL, WebSockets (Socket.IO), authentication flows

Databases: PostgreSQL, MySQL, MongoDB, Prisma

Fintech Domain Experience: Mobile crypto wallet product, wallet balance & transaction history, deposit/withdrawal flows, KYC onboarding, P2P trade management, real-time wallet/transaction status ([Socket.IO](https://socket.io))

Cloud & DevOps: AWS (EC2 & RDS), Docker, CI/CD (GitHub Actions), Git/GitHub

Engineering Practices: Code reviews, clean architecture & documentation, technical/API documentation, Agile/Scrum, sprint planning & retrospectives,

debugging & production issue resolution

PROFESSIONAL EXPERIENCE

Full Stack Engineer — AbS Technologies (abstechconnect.com) Mar 2024 – Present

- Built and maintained modular React and TypeScript frontend components and Node.js backend services for a large-scale platform serving students, administrators, and internal stakeholders.
- Integrated RESTful and GraphQL APIs and third-party services, handling authentication, pagination, and error states; stepped directly into the Node.js backend when features required backend changes.
- Refactored large sections of the codebase into reusable, documented components, improving maintainability and reducing technical debt.
- Enforced clean architecture and coding standards through regular code reviews, and collaborated across Product and Design in full Agile sprint cycles.
- Contributed to CI/CD pipelines (GitHub Actions) and AWS EC2/RDS deployments, improving deployment reliability and scalability.
- Debugged and resolved production issues end-to-end, improving application performance and reliability.

Frontend Engineer (Team Member) — DigiYo Jul 2025 – Mar 2026

- Built responsive React and TypeScript components from design specifications, maintaining consistency with the platform's shared design system.
- Implemented real-time UI updates via WebSockets (Socket.IO) for notification counts, chat indicators, and live feed updates, integrating REST API responses directly into components.

- Collaborated with backend engineers on API contracts and participated in code reviews and sprint planning within an agile team.

Frontend Engineer (Team Member) — HelloBob *Nov 2024 – Jun 2025*

- Built React interfaces for a mobile crypto wallet product, including wallet balance display, transaction history, deposit/withdrawal flows, and KYC onboarding steps.
- Integrated REST APIs and WebSocket (Socket.IO) real-time events for live wallet status and transaction state changes, handling authentication and edge-case states.
- Built P2P trade management UI (trade listings, status tracking, bank account management) to backend-provided API contracts, maintaining reliability across loading, error, and partial-payload states.
- Participated in code reviews and design handoffs within a cross-functional fintech product team.

PROJECTS

Jobify: A job management platform where users create, edit, and manage job listings with dynamic status tracking for pending applications, scheduled interviews, and declined jobs. Built with React, Node.js, MongoDB, and REST APIs.

4TK Shop live at 4tk.shop: A full-stack e-commerce application for a client with product search, filter, sort, pagination, single product detail pages, and payment checkout. Built with React, Node.js, and REST APIs.

CERTIFICATIONS

- JavaScript Algorithms and Data Structures, FreeCodeCamp, 2022.
- Responsive Web Design, FreeCodeCamp, 2021.
- Software Development Associate Engineer Certification, Paradigm Initiative, 2019.
